Subject: Update IUNGO vr.8

We hereby inform you that from 26/05/2021 the IUNGO management system will undergo updates aimed at improving customer-supplier relations.

Below are listed the specific updates and then detailed:

1. Decimals and prices update;
2. Scheduling Update and Delivery Plans;
3. Origin Declaration update.

1. Decimals and prices update

For a correct view, the number of decimal places, delivery quantities and price has been updated as follows:

Campo	Esempio valore	Numero cifre decimali
Quantità	30,000 pz	3 per FAAC Electronics Ltd
	30,00 pz	2 per le altre
Prezzi e totali	5,67 €	2

2. Scheduling Update and Delivery Plans

To simplify the understanding of the new IUNGO schedule, the comparison with the current IUNGO and the new update are highlighted below:

- **Current schedule IUNGO**

In the current schedule the quantities in delivery are reported at one of the two columns O (ordered) and F (forecast), present in each week:

Figure 2

The quantities in column O look like a "BUTTON", are fixed but allow the supplier to reschedule them, while those in column F can still vary and therefore are not rescheduled.

- **Schedule update IUNGO vr.8**

In the new version of IUNGO the updates consist of:

- I. Unification of columns O and F into a single column as shown in red in figure 3. The purpose of this change is the reduction of the document size and the solution of some ambiguities with respect to the quantity being delivered. When quantities enter within the fixed horizon, they get the visibility of a "BUTTON". All delivery plans have a fixed horizon of 2 weeks, except for some cases that may vary;
- II. In the order row, in the column "Material", the EAN code was added.

Pos.	Materiale	Descrizione	Prezzo	UdM	Mag.	Scaduto	20-05-2021 21-05-2021	24-05-2021 28-05-2021	31-05-2021 04-06-2021	07-06-2021 11-06-2021	Fino a fine Giugno	Luglio

Figura 3

This simplification in column representation is aimed at communicating more directly to the supplier the total quantities required by the FAAC planning.

In this way it will be easier to consider as confirmed also the quantities that do not have the appearance of a "BUTTON", if they appear within the lead time of supply.

The new version of IUNGO distinguishes only between lines that can be delivered in the following weeks (which have the appearance of a "BUTTON"), and lines that can be produced compatibly with the lead time of the supplier.

3. Origin Declaration update

The signed Declaration can be sent in UPLOAD mode (no longer attaching the Declaration by sending by email generated by IUNGO as it happens now).

The supplier must return the two signed declarations (preferential and non-preferential declarations of origin) in this way:

- Press the Print button at the bottom of the page to generate the PDF of the Declaration.
- Sign the PDF (digitally or by printing and signing it).
- Return the signed PDF by clicking on the "Click here to add Certification".
